

EVERETT PUBLIC SCHOOL DISTRICT AND ARAMARK TAKE FOOD SERVICE TO A HIGHER LEVEL

The Everett Public School System is committed to raising the expectations and strengthening the collegiality among administrators, teachers, parents, students and the community in order to educate the whole child.

The Everett Public School system consists of eight schools, 5 K-8 schools (Madeline English, George Keverian, Lafayette, Albert N. Parlin & Sumner G. Whittier School), Pre-K3-5 (Webster School), Pre-K3 (Adams School), and a new High School. To maintain its success and continue student passion for learning, the school continually looks at areas that will improve the overall student learning environment, including the District's Food Service Program. In partnering with ARAMARK Education, the District has successfully enhanced the Food and Nutrition Program, with expanded menu options; age-relevant, student-focused dining environments; and an added focus on sustainability.

EXPERTISE IN ACTION—SPEED OF SERVICE EQUALS INCREASED PARTICIPATION

ARAMARK has partnered with Everett Public Schools since 1991. The most compelling information about how we manage Everett is in the numbers—we drive participation to 90 percent.

Our client will tell you that no one can manage the Everett program like ARAMARK Food Service Director Maria Davis. Maria offers more than 60 entrées daily to her high school students, including made-to-order pasta dishes and sushi. All of her breads, rolls, and pizza dough are made from scratch on site at the high school. She moves more than 440 high school students through her lines smoothly in the allotted 18-minute lunch periods for a total of four waves and more than 1,600 students daily.

This level of quality and variety is how we do business. One visit to Everett will help you see how to engage students in your program, deliver these results, and increase the quality and variety of the choices.

“Change...For the Better”

Renwed Focus on Health and Wellness

In September we featured fresh produce from local farms. Students were offered plums, nectarines, apples, tomatoes, peaches, broccoli, cucumbers, and salad greens from Massachusetts and Rhode Island farms such as Pioneer Valley Farm, Jansel Valley Farm, Oakdale Farm, and Confreda Farm.

The Healthy for Life program creates healthier school environments through nutritious menus, wellness education, and parental resource materials. As part of Healthy for Life, Everett Public School District menus will include more fresh fruit and vegetables, whole grains, lean protein choices, low- and nonfat dairy items, 100 percent fruit juice, and water. ARAMARK continues to reduce added fats, sugars, and salt;

eliminate added trans fats; offer healthy, nutrient-dense snacks; source high-quality, local produce and products; and promote and expand the availability of breakfast.
